

Oswestry Radio Car Club

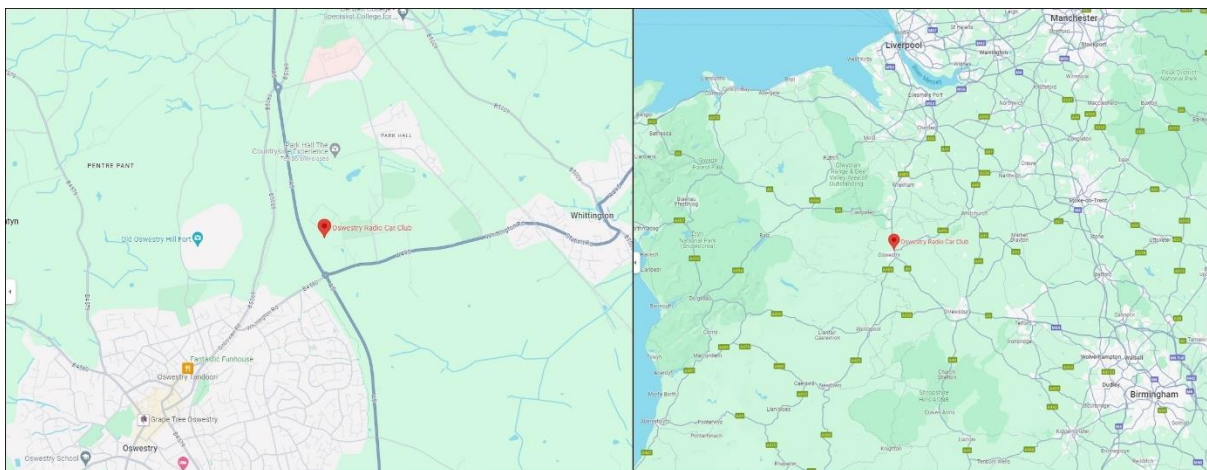

Fact Sheet

Club Details:

- BRCA Club Membership Number: 161346
- Club Chairman: Jeff Stanton
- Contact Email: orcc.booking.in@gmail.com
- Venue Address: Oswestry Show Ground, Park Hall, Oswestry, Shropshire, SY11 4AD
- Facebook: <https://www.facebook.com/OswestryRadioCarClub>

Location:

The track is located at the Oswestry Show Ground in Shropshire. Road links to the venue are superb: from the north, M6, M56 and A483, from the south M6, M54 and A5. The track is easy to find as it is ¼ mile from the A5. See the maps below.

Venue:

The showground is an ex-military camp. The Oswestry showground is excellent for camping (there are many caravan rallies held there each year). There are hard service roads and plenty of grass. Toilets will be open 24 hours a day and there is a drinking water tap. The toilets are all ground floor providing good disabled access.

The Track:

The overall track size is 25m x 40m, tucked away nicely against one of the ex-military camp buildings. The track surface is sanded astro turf and offers a fantastic offroad experience for 1/10 buggies as it's the only class that we race.

Features:

- Banked corners
- Bomb hole
- Double jump
- Corner table top
- Purposely raised and lowered sections

The track edging is created using heavy rubber hose and is secured in place with rubber inner tubes and pegs (which do not affect the cars in any way).

Depending on the track layout and conditions, lap times are usually between 20 and 30 seconds.

The track and surrounding areas can become slippery when wet, so please where appropriate shoes (no flat or nearly flat soles).

Tyres:

The tyre of choice for club night racing is Schumacher yellow mezzos / yellow cut stagers in the dry. With Ballistic Buggy green mini spikes or Schumacher silver mezzos / silver cut stagers in the wet.

Car Parking / Pitting:

Plenty of outdoor pitting and parking is available. However, no mains power is provided.

Rostrum:

The rostrum comfortably stands 10 drivers and is accessed by steps.

Timing System:

We use a AMB RC2 decoder for our timing system.

PA System:

A powerful PA system is used both within the track area but also within the pitting space. Making it easy to hear timing and announcements.

Toilet Facilities:

Indoor toilets are available, including disabled facilities and baby changing.

On Site Camping & Overnight Stays:

Both a Premier Inn and Travelodge are a 5-minute drive away from the track.

- Premier Inn Oswestry - Maes Y Clawdd Maesbury Road Industrial, Maes-Y-Clawdd, Morda, Oswestry SY10 8NN
- Travelodge Oswestry - A5 Mile End Services A483, A5/A483 Mile End Service Area, Oswestry SY11 4JA

Camping is available either on the hard service car park or on the grass (plenty of space available). There is also an Elsan waste point available for caravans.
